Gardens - market.....14,	30	

Introduction

Extension work in 1933 was carried on by 4149 county extension agents assisted by the equivalent of 1025 full-time subject-matter specialists. In addition, on June 30, 1933, 190 emergency agricultural assistants had been employed to assist with the cotton acreage reduction campaign of the Agricultural Adjustment Administration. The addition of the emergency assistants more than offset the decrease of 128 regularly employed agents since 1932. (Table 1.) The statistical information contained in this report is based on the annual reports of 3969 county extension agents who reported on all extension work done in their respective counties, supplemented by reports of State supervisors covering work in counties without extension agents.

Table 1 - Number of County Extension Agents Employed and Number Reporting.*

Kind of extension agent	Number employed June 30, 1933	Number of reports included in 1933 summary
County agricultural agents.....	2413	2293
Emergency agricultural assistants...	190

Negro agents (club).....	<u>1</u>	<u>2</u>
Total number county club agents..	202	164
Total number of all agents.....	4339	3969

*Assistant extension agents included.

**In some instances, work done by club agents was included in the reports of the county agents.

DISTRIBUTION: A copy of this circular has been sent to extension directors, State and assistant State supervisors, extension specialists, extension editors, State agricultural college libraries, and State experiment station libraries.

National Program of Work

The relative amount of time county extension agents and specialists devoted to the various subject-matter lines of work gives a fairly good picture of the national program of extension work. (Table 2.) For purpose of comparison corresponding percentages for 1932, 1931, 1930, 1929, and 1928 are given.

Table 2 - Percentages of Agents' and Specialists'* Time Devoted to Projects**

Miscellaneous.....	17.0	16.3	7.5	8.0	7.5	8.9
Building extension program	--	--	3.7	3.7	4.4	4.4
Organization.....	--	--	7.1	7.2	8.0	8.4

*Only field work of specialists as reported by county extension agents is included.

**In 1930, 1931, 1932, and 1933, time spent on soils was distributed among the various crops; nutrition was combined with foods; child training and care added as a new project; and time spent on maintaining the county extension association and in building extension programs separated from miscellaneous.

It is interesting to note the uniformity in the proportion of agents' and specialists' time devoted to the different subject-matter lines during these six years. Farm crops in 1933 occupied 14.3 percent of the time of extension workers; horticulture, 9.8 percent; miscellaneous activities, 8.9 percent; agricultural economics, 8.5 percent; organization, 8.4 percent; foods and nutrition, 8.0 percent; poultry, 5.8 percent; and animal husbandry, 5.5 percent.

Total Extension Influence

The question is repeatedly asked - how many different people are reached in any one year by the program of cooperative extension work? This is a difficult question to answer satisfactorily due to the nature of extension teaching. The agents were asked, in connection with the 1933 annual reports, to make conservative estimates of the numbers of farms and homes in which substantial changes in practices definitely resulted from extension teaching activities. The summary of these county estimates indicates that during the year 1933 substantial changes in practices resulted from the agricultural extension program on 2,035,871 farms and from the home demonstration program in 646,057 farm homes and 229,875 other homes. 4-H club members were enrolled from 449,521 farm homes and from 109,934 other homes. The entire cooperative extension program substantially influenced 2,624,289 farm families or more than 40 percent of all the farm families in counties with extension agents.

Result Demonstrations

The total number of adult result demonstrations conducted in 1933 was 1,378,315 as compared to 1,226,082 for 1932 and 1,090,011 for 1931. The number of projects completed by club members was 1,185,563 as compared to 1,205,108 in 1932 and 1,114,065 in 1931. (Table 3.)

Regarding adult demonstrations, the only projects which showed a decrease in 1933 over 1932 were legumes and forage, animal husbandry, dairy, rodents and insects, feeds and nutrition, and miscellaneous.

In connection with junior club members completing, there was a decrease in 1933 over 1932 in all projects except forestry, poultry, child training and care, house furnishings, and miscellaneous.

Table 3 - Adult Result Demonstrations and Junior Projects Completed
1930-1933 as Reported by all County Extension Agents.*

*In 1930, 1931, 1932, and 1933, time spent on soils was distributed among the various crops; nutrition was combined with foods; child training and care added as a new project; and time spent on maintaining the county extension association and in building extension programs separated from miscellaneous.

**Boys' and girls' club members completing.

4-H Club Work

The number of different boys and girls enrolled in 1933 was 3,647 less than in the previous year and the number of different boys and girls who completed the work outlined in 1933 was 4,868 less than the number who completed in 1932. The number of projects started was lower in 1933 by 2,625 and the number of projects completed lower by 19,545 than in 1932. (Table 4.)

For the first time since 1919, the year immediately following the World War period, there has been not only no increase in 4-H club enrollment over the preceding year, but a small actual decrease in enrollment. At first thought, this decrease in 1933 might be assumed to be due to the time required of agents to assist with the production-reduction campaigns of the Agricultural Adjustment Administration. A more probable explanation is the decrease in the number of county extension agents between June, 1932, and June, 1933.

Table 4. 4-H Club Work

Item	1930	1931	1932	1933
Junior clubs.....	56180	60781	59081	57400

Total completing.....	554345	629243	670722	665854
Projects started.....	1535619	1693866	1765480	1762855
Projects completed.....	971308	1114065	1205108	1185563

According to Table 5a, 66.33 percent of the boys and girls were enrolled in club work two years and under, 15.83 percent were enrolled three years, while the other 17.84 percent have been in club work for a period of four years or more. The average length of membership of 1933 club members was 2.29 years for boys and 2.18 years for girls, or 2.22 years for both boys and girls.

From Table 5b, it will be noted that 40.13 percent of the boys and girls in club work were 12 years old and under, 38.67 percent were 13 to 15 years inclusive, and the remainder, or 21.20 percent, were from 16 to 20 years of age.

Statistical Summary

Table 6 gives a detailed statistical summary of the results of cooperative extension work in 1933. The results as reported by county agricultural agents, county home demonstration agents, and county club agents are listed separately. The number of county extension agents of each kind reporting on the various items is also given for purpose of comparison. A complete summary of all club work is given in Table 7, page 29.

Agricultural Adjustment Administration Activities

The Cooperative Extension system was selected to conduct the educational work connected with the production-control campaigns being instituted. During 1933, extension workers assisted with three such campaigns: Cotton, wheat, and tobacco. Table 8 shows the amount of time county extension agents and Smith-Hughes teachers devoted to these campaigns during the report year, and presents a summary of the activities conducted by agents to advance the various programs.

Emergency Activities

In addition to Agricultural Adjustment Administration programs the extension personnel has given unusual emphasis during the year to assisting rural people with credit relief, home production and preservation of food, and numerous other problems made important by the depression. These emergency activities are presented in Table 9.
